

SAFETY ALERT: TONGYUAN Magnetic Building Block Set

Sample taken from

Seller "fangguofeng_82" on Ezbuy

Comments

During the testing of this sample, it was found that the product did not comply with the safety requirements for toys:

- ISO 8124-1:2014 – Safety of toys – Part 1: Safety aspects related to mechanical and physical properties

The metal balls and multiple components (some examples shown below) are small parts which could pose a choking hazard. The product and its packaging do not have information provided in English to warn consumers of these hazards.

The plastic bag that holds the components is large and thin enough to pose a suffocation hazard to children.

The magnetic strength of the green bars is too strong and could cause internal injury if two or more of them are accidentally ingested.

No report of incident or injury related to the use of this product has been received to date.

What should consumers do?

Consumers who have bought the product are advised to stop using it immediately.
