

CONSUMER PRODUCT SAFETY OFFICE

Reference : CPSO-240724-17
Date : 24 Jul 2024
To : Suppliers of baby bouncers
Subject : Baby bouncers must comply with EN 14036 or ASTM F2167

This circular is to remind suppliers of baby bouncers that baby bouncers supplied in Singapore must conform with applicable international safety standards as required under the Consumer Protection (Consumer Goods Safety Requirement) Regulations.

2 The Consumer Product Safety Office (CPSO) conducts regular post-market surveillance to detect non-compliant general consumer goods supplied in Singapore.

Non-compliances detected from surveillance of baby bouncers

3 Recent surveillance of baby bouncers detected non-compliances to the applicable safety standards:

- Presence of small parts which can pose choking hazards.
- Insecure restraint system and lack of locking mechanism which can pose fall risks.
- Presence of crevices and openings on structure which can pose entrapment risks to baby's fingers.

4 Suppliers of these baby bouncers were directed to cease supply or rectify the non-compliances.

Reminder to baby bouncer suppliers

5 Suppliers of baby bouncers must ensure compliance to applicable international safety standards such as EN 14036 or ASTM F2167.

6 Suppliers of any non-compliant general consumer goods will be directed to cease supply. Any person who fails to comply with the directions given by CPSO shall be guilty of an offence and liable on conviction to a fine up to \$10,000 or to imprisonment for a term 2 years or to both.

7 For enquiries, contact CPSO at consumerproductsafety@enterprisesg.gov.sg. Alternatively, visit the CPSO website at www.consumerproductsafety.gov.sg.
