

## **SAFETY ALERT: Puku Izzy Foldable Baby Cot (Model No: P30112)**

### **Sample taken from**

Puku on Lazada

### **Comments**

During the testing of this sample, it was found that the product did not comply with the safety requirements for baby cots:

- ISO 7175 (1997): Child care articles – Children's cots and folding cots for domestic use – Safety requirements and test methods.

There were edges around the product that were not well-rounded and could pose a laceration hazard.

Internal dimensions of the product do not meet the minimum requirement; this could pose a falling hazard as children may climb over the product.

Gaps were found on the foldable side of the product forming snag points. This could pose a strangulation hazard if loops or loose clothing parts unintendedly get caught in the gaps.

The locked castors do not meet the minimum required force to be operated, this could pose a stability hazard if product is moved unintentionally.

Bed base may be adjusted without a tool; this could pose a stability hazard if adjusted unintentionally.

Small bits of foam from the mattress may be detached and pose a choking hazard.

The gaps between the foldable side and cot base do not meet the requirements, this could pose a pinching hazard.

The side rail of the cot base broke when subjected to a durability test. The sharp edges formed from the breakage could pose a laceration hazard.

The gap between cot's slats do not meet the requirement of 45-65mm, posing an entrapment hazard.

Instructions provided were not in accordance to the requirements.

No report of incident or injury related to the use of this product has been received to date.

**What should consumers do?**

Consumers who have bought the product are advised to stop using it immediately.
